

2003/1

JUtil

Holger Zahnleiter
holger@zahnleiter.org

Date: 07.04.03

Abstract

JUtil is a Java class library containing some auxiliary classes and convenience methods, which you might find usefull when developing Java programs. Anytime I find a very common and simple class or (static) method, I add it to this library.

1 Project characteristics

Project code	2003/1
Project name	JUtil
Started	03.04.03
Ended	03.04.03
Version/release	1/1
Used tools and libraries	JDK 1.4.1 (sould also work with older versions of JDK)
Runs on platform	Any system with a JVM

2 Contained classes

I will just briefly explain the contained classes and methods. If you are interested in details, please refer to the Javadoc API documentation available on my homepage.

3 Text

Functionality focused on string/text processing. Examples for included methods are `isEmpty()` or `isJavaIdentifier()`.

A List of project files

File Name	Comments
bin\jutil.jar	Java archive.
build.xml	Ant build file.
src\org\zahnleiter\util\Text.java	Text/string related convenience methods.
